To Whom It May Concern:

I have known Trace for close to 20 years. During that time I have been to houses, museums, hotels, and events, where she has done the floral decorations. I have also seen gardens she has designed, and I have read her work in various publications.

Over and over, I have been enthralled by the great sense of beauty, artistry, and imagination she brings to her work. I have been impressed at how she can take her considerable floral arranging sensibility and talent and translate it to large-scale gardens and fabulous landscapes.

Her sense of design is always so surprising; I would consider it ground breaking.

She has written on a wide range of subjects including floral arranging, outdoor décor, and home decorating and entertaining. Her garden column is full of wisdom, inspiration, good tips, sound gardening practices, and innovative applications. She is obviously moved to communicate as well as to create.

Another thing I admire about Trace is her commitment to organic and sustainable procedures in all the gardens she works with.

I heartily recommend her without reservation.

Feel free to contact me.

Sincerely,
